

A collage of various mechanical and automotive parts. At the top center is a large, clear, rectangular headlight lens. Below it is a brass-colored metal bracket with green screws. To the left is a white plastic component. In the center is a black fuel pump with a black hose. Below the fuel pump are two large black gears. To the right is a green plastic component. At the bottom is a black carburetor with two circular air filters. The background is a light-colored surface with some yellow and blue markings.

## *The AGM*

August 16 2014 1100hrs we met at the Bridgewater Hotel for a casual stroll around the area. Chris and I had been there prior to check out the venue for meals and a meeting place plus a walk. Everything organized and then she decided to go on holidays. Never mind, bite the bullet and fumble our way through.

Jimmy and Lyn were parked in one car park when we arrived; Wayne and Helen were in the bottom park but soon found us and moved their car up near ours. We said our hellos and waited a bit to see if we had any other players for our "Harry Butler in the wild tour".

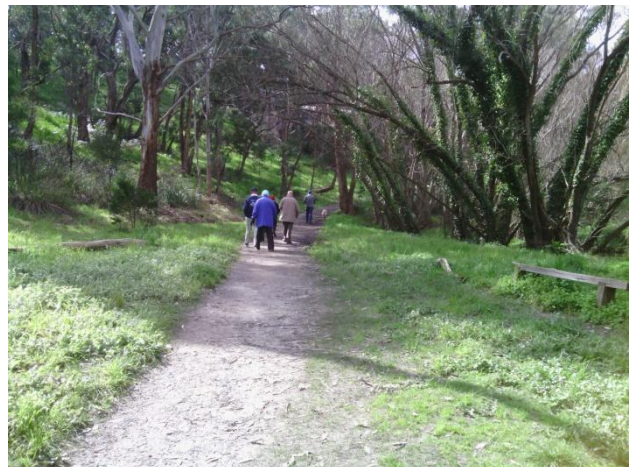

They were the walkway crossed over the hill Meandering decided we as cars couldn't around bends know where found a couple oval that Heysen Trail them. We soon couple who for a swim in flowing nicely

doing maintenance on under the road so we the road and headed up adjacent to the oval. along like stray cattle we should get off the road see us as they came in the road and we didn't we were going. We of markers nearer to the seemed to indicate the and decided to follow had company, a young had a dog that liked to go the creek which was from the recent rains.

The weather was freezing but the dog didn't care. We followed the path not really knowing where we were going, met another walker with dog in tow. We told him we were interstateers who where lost and he gave us directions to get back to the pub. Just go up this lane (a 45 degree climb) then turn left and the pub's just down there. A pretty walk along the creek with spiderman, sheep, fairies and dogs hanging in the gardens along the banks, don't see that in the city. A good hour well spent.

Tom and Nora were sitting by the fire sipping coffee when we got back to the Hotel and had found our table. We chatted about holidays and how cold it has been as others arrived, then seated ourselves for our meal. 13 people all told, a good turnout. Everyone enjoyed themselves. Thanks folks.....Di

Please forward your registration form and payment to  
Chris Cutting by 30 September 2014

## PRESIDENT'S RAMBLINGS

I saw an older car the other day similar to one I owned years ago and it got me thinking of the cars I've had over the years, some I should have kept others don't matter so much. My first mode of transport was a BSA Bantam Major, all 150cc of it, which was fine until I had to move to Adelaide for work in the late 60s. The brakes were not too flash so it was decided that it should not make the trip to the big smoke. I used my Dad's scooter, a Raleigh Roma which he had bought while we lived in PNG, I don't think they were sold here

as I have never seen another one. It didn't go fast but it would stop on a sixpence. That kept me mobile until winter came along and a car was needed. Enter one 1957 Hillman Minx. A good reliable little car but it didn't have a radio so I bought one on HP for \$25, took me 3 months to pay it off.

A couple of years later and being a final year apprentice and rolling in money I upgraded to a 1968 Toyota Corolla 1100, what a great car, handled like it was on rails, well after the Hillman that's what it felt like. I recall fitting a sports air cleaner to it and sounded like a 20% power boost and with my home made muffler with a 3" outlet (who thought they were a new thing for go fast turbo cars) I was all set to take on the big boys at the lights.

A few years on and working on the west coast of Tasmania (on mining money) the time had come for a new car. The 1974 Toyota Corona looked like a small Mercedes on the adverts and like any new car on a test drive felt very comfortable to drive. 2 litres instead of 1100cc made a hell of a difference on the Lyell Hwy up and down from Zeehan to Burnie.

Several years passed before the need for change, this time to a Toyota Hi-ace camper, seemed to be a better option than tenting and was small enough to be the daily driver, but after a year or so found that it wasn't getting the expected use and

was swapped for a Corolla wagon. This Toyota was again an excellent car but someone in our group of friends had bought a newer car and the need to upgrade was thrust upon us. A 1978ish Corona wagon became the flavor of the month

Somewhere in this timeframe I bought a Toyota Tiara as a second car. It was only \$200 and ran well. It had been painted with a vacuum cleaner in a sand storm but was straight as a die and rust free. I recall putting new plugs and points in it, just to freshen it up, and it wouldn't run so I cleaned up the old ones and fitted them back in, fired it up and it didn't miss a beat after that. Had it for a year or so, not sure why it moved on. These are quite collectable now but we can't turn back time.

Then came the stabilizer. In 1981 I bought my first P76, a Targa Florio and the rest is history

Somewhere in there was a Morris 1100 for a while and a Humber Vogue Sports 1964 vintage which I have since discovered only 1200 were manufactured. They had the Sunbeam Rapier alloy head in lieu of the cast iron variety, disc brakes on the front and stiffer suspension. The speed floor shift was a real joy. Once again I'm not really sure why we sold it. Priorities at the time I guess.

More next time.....Nigel

MINUTES OF THE GENERAL MEETING OF THE LEYLAND P76 OWNERS CLUB (SA) INC.  
HELD AT THE BRIDGEWATER INN BRIDGEWATER ON AUGUST 16 2014

---

## SA Club Spares Parts

Please still contact the club through Christine Cutting for spare parts

Email [gcutting@chariot.net.au](mailto:gcutting@chariot.net.au) or 082703799

---

---

If you are looking for parts or have parts for sale put your advert in the Classifieds

---

Due to my being away for 4 weeks this August magazine as you are now aware is late my apologise for that. It is also after the September general meeting.

I have taken on the Editorship for another year as well as the contact person for spare parts although nothing much is happening on that front. We are still waiting on the number plate lenses from WA and a stock take will be done shortly by Nigel & Wayne. An urgent request recently for parts from an ex member we could not supply but I helped him out with some second hand parts from "The Garage".

As you can see from the parts list included in the magazine we still have many mostly new or reproduced parts and they are member prices keeping the costs low.

I put forward at the September meeting to have the magazine Bi monthly as a couple of interstate clubs now do which was agreed on. The next magazine will be Sept/Oct and will contain the minutes of the Sept/Oct meetings and will be out mid October and the every 2 months from then.

Please still feel free to submit articles you think may be of interest.

*Christine Cutting – Editor*
